🏠 Islamabad, Pakistan

Objective

I am a Computer Science graduate, seeking career opportunities in prospective companies to improve my knowledge, skills and acquire experience. My long term goal is to use my skills to help emerge Pakistan as a leader in the ongoing 4th Industrial Revolution.

Technical Skills

Programming

Strong grip on programming concepts and best practices.

- Languages: **C#, Python, C++, Swift, Bash.**
- Frameworks: **.NET, Flask.**

Machine Learning/Data Science

Worked with python libraries like **Pandas, NumPy** and **Sci-kit Learn**.

Can train, test and deploy machine learning models using **Keras** and **Tensorflow**.

Web Development

Can develop Web Applications and APIs using **Flask, JavaScript, JQuery** and **HTML/CSS/Bootstrap**.

Other

Familiar with **Agile**, Version control using **Git** and document preparation using **L^AT_EX**, Markdown/Pandoc. I Can write decent technical documentation and learn new technologies quickly.
