Objective

I am a Computer Science graduate, interested in Machine Learning, Data Science and Cybersecurity, seeking career opportunities in prospective companies to improve my knowledge, skills and acquire experience in technology industry.

Education

Artificial Intelligence Course (1 year)   *Sep 2019 - Present*
Presidential Initiative for Artificial Intelligence & Computing (PIAIC)

BS in Computer Science   *2015 - 2019*
Bahria University, Islamabad.
Final Year Project: Fake News Detection using Natural Language Processing.

Technical Skills

Programming

Strong grip on programming concepts and best practices.

- Languages: **C#, Python, C++, Swift, Bash.**

- Frameworks: **.NET, Flask.**

Machine Learning/Data Science

Worked with python libraries like **Pandas, NumPy** and **Sci-kit Learn**.
Can train, test and deploy machine learning models using **Keras** and **Tensorflow**.

Web Development

Can develop Webapps and Web APIs using **Flask, JavaScript, JQuery and HTML/CSS**.

Other

Familiar with Agile, Version control with Git and document preparation with LaTeX. I Can write decent documentation and learn new technologies quickly.
